

Heatmap visualization of the 1000 most frequent words in the Brown corpus. The x-axis represents word frequency (2900 to 3950) and the y-axis represents word count (1 to 1000). The color scale ranges from dark blue (low frequency) to dark red (high frequency). The top row shows the highest frequencies, with values ranging from 2900 to 3950. The bottom row shows the lowest frequencies, with values ranging from 2900 to 3950. The heatmap shows a clear pattern of high frequency for the top 100 words, which then decreases as the word count increases.
